

## Senior System Analyst

**Summary of Job Responsibilities:** The Sr System Analyst is a highly motivated individual who constantly strives to increase their technical expertise in computer technology. He/she is expected to perform independently, or as part of a team, to design, implement and support identity management systems for the University. He/she must be capable of interacting with the IT department, external vendors and within the user community. This position is responsible for the design, deployment and ongoing support of a seamless role based identity management environment which strives to be as automated as feasible, while adhering to the standards of the Information Technology Department.

### **Essential Duties and Responsibilities:**

- Install, implement, and maintain vendor developed software.
- Code, test, and document programs required by University departments.
- Collaborate with MIC and University personnel to determine the processing needs and use standard system design techniques to devise the resulting information system.
- Support clients in the various University departments using vendor developed or in-house developed software and data integration issues with PC/Server software applications.
- Maintain an awareness of, and increase his/her personal knowledge of technical developments in computer hardware, software, programming languages, and system design techniques.
- Conduct system assurance tests of all software before releasing software to operations for production.
- Maintain documentation on any programming changes.
- Provide troubleshooting and maintenance support for existing systems.
- Other duties may be assigned as required.

### **Qualification Requirements:**

**Education and/or Experience:** A BS degree in computer science or related field, 5 years equivalent work experience, or a combination of an AS degree in computer science or related field with relevant work experience would be acceptable.

**Technology Skills:** Experience in some of the following areas is required:

- MS Office or Google Workspace
- Identity Management, LDAP, Midpoint, Microsoft AD
- CAS, Single Sign On (SSO)
- SQL, PL/SQL
- Oracle
- Linux

**Other Skills and Abilities:** Familiar with the following areas is preferred:

- Ellucian Banner, DegreeWorks, BDM, Argos, Ethos
- Web (Apache, Java, JSON, Groovy & Grails, Page Builder)
- MySQL, PostgreSQL

**Supervisory Responsibilities:** None.

**Other:**

Employee will be required to attend various employee meetings, training, committees and other special activities as depicted by supervisor. Occasional lifting may be required.

**Benefits:**

Competitive benefits package including health insurance, 16 paid holidays, tax-deferred retirement contributions, vacation, and sick leave. More information can be found by visiting the Benefits page of the VU website: <http://vinu.edu/human-resources>

**How to Apply:**
